Specialization Introduction Course Introduction Course objectives Topics and assignments	Module02 Quiz Total points 10 Module02 Quiz Quiz • 30 min	
Database management software requirements	A database management system (DBMS) is important to modern organizations because:	1 point
Database characteristics Organizational roles	Submit your assignment It provides infrastructure for	Resume assignm
DBMS overview and database definition feature	daily ope Pauté or Ns ov 28, 11:59 PM PST Attempts 3 every 8 hours O It facilitates decision making	
Non-procedural access Transaction processing overview	process Receive grade	Your grade
Data warehouse processing overview	To Pass 80% or higher It helps organizations to manage their data	-
Review Quiz: Module02 Quiz 10 questions Reading: Optional reading 10 min	All options Like ☐ Dislike ☐ Report an issue	
	2. The most active functional users are called:	1 point
	○ Indirect users	
	O Parametric users	
	O Power users	
	Database administrators	
	3. Which statement is TRUE about database:	1 point
	A database stores program's variables and codes	
	Database is a generic name for collecting and storing data	
	Only few users can use the database	
	Entities in database cannot have	
	relationships	
	4. The difference between database administrator and data administrator is that:	1 point
	Data administrator has planning role	
	Database administrator has planning role	
	O Data administrator has more technical skills	
	Database administrator has less technical skills.	
	5. Types of DBMS includes:	1 point
	○ Enterprise DBMS	
	O Desktop DBMS	
	○ Embedded DBMS	
	All options	
	6. Nonprocedural access includes using the followings EXCEPT:	1 point
	○ Form	
	Query	
	Reports	
	○ C++	
	7. "is a	1 point
	unit of work that should be processed reliably without interference from other users and without loss of data due to failures" This definition is for:	
	Information	
	O Database	
	Transaction DRMs	
	○ DBMS	
	8. Which of the followings	1 point
	is a characteristic of data warehouse: The data in warehouse is optimized.	
	The data in warehouse is optimized for generating reports	
	The data in warehouse is a backup for operational database	
	Data warehouse cannot include data from external sources	
	The data in warehouse is not integrated.	
	9. Which of the following is a characteristic of the fourth DBMS generation:	1 point
	Requires a computer program to	
	access the data	
	Supports sequential search only Can store and manipulate	
	 Can store and manipulate unconventional data 	
	Known as relational DBMS	
	10. An example of unconventional data is:	1 point
	☐ Images	
	○ Videos	
	○ Maps	
	All the options	
	Upgrade to submit
